Few Spots Left

Late May
2026 Launch

Complex Airspace Ops

Learn how to operate UAS safely within the DC SFRA (Special Flight Rules Area) and FRZ (Flight Restricted Zone), and understand the certification process.

- FAA regulations and compliance requirements
- Flight planning in restricted zones
- Understanding the path to certification

Chemical Science

Deep dive into chemical safety and the specific science behind the eco-friendly solutions used in aerial soft washing.

- Environmental chemistry fundamentals
- Biodegradable cleaning agents
- Safety data sheets and handling protocols

The Future of Service

Real-world application of UAS technology in the modern workforce through hands-on site work at actual residential and commercial properties.

- Industry trends and emerging technologies
- Business operations and client management
- Hands-on field experience at real job sites
